**REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: With regards to claims 1-21 and 27, the prior <sup>art</sup> ~~ad~~ of record does not disclose or fairly teach a plurality of fixed electrodes, each located interleaved with and adjacent to one of the moving electrodes, having generally planar major surfaces perpendicular to the plane of the substrate, wherein in response to the application of an electric actuation voltage, electrostatic forces develop between the moving and fixed electrodes causing the moving electrodes to move along an axis parallel to the plane of the substrate and perpendicular to the planar major surfaces of the electrodes, thereby forcing the contact shuttle to move to the second switch state position along the axis parallel to the plane of the substrate and perpendicular to the planar major surfaces of the electrodes. With regards to claims 22 and 28, the prior art of record does not disclose or fairly teach an isolation mount connecting the contact shuttle and the driven member, a retainer member fixedly connected to the either the contact shuttle or the driven member or and engaging member connected to either the contact shuttle or driven member but free form connection with the retainer member. With regards to claims 24- 26 and 29, the prior art of record does not disclose or fairly teach a convex contact shuttle sized between and shaped to extend into the concave gap.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
